Forecast for Thursday 01 Jul 2021

Weather: Areas of low cloud at first, also isolated mist and fog patches possible in the valleys, but quickly clearing this morning. Then spells of strong sunshine developing this morning, but also isolated afternoon showers, which may be heavy. Any showers will fade this evening.

Chance of cloud free mountain/hill tops above 600m: 70% increasing 100% through today.

Visibility: Isolated fog patches reducing visibility in some valleys at first this morning, and with some patchy hill fog. Otherwise, cloud remaining above the summits, allowing for very good visibility of surrounding areas.

Forecast for Friday 02 Jul 2021

Weather: The risk of some low cloud and fog arriving overnight, mainly across southern and western areas, but this will quickly clear after sunrise. A largely fine day follows with variable amounts of cloud and sunny spells. However, isolated heavy afternoon showers are possible, these fading through the evening and then staying dry for the for the night period.

Maximum wind: Winds on the summits west or southwest 10mph.

Chance of cloud free mountain/hill tops above 600m: 70% soon increasing 100%.

Visibility: Low cloud and fog potentially bringing poor visibility to areas below 400m early in the morning, with clear conditions above this. However, largely good visibility of surrounding hills through most of the day, with moderate visibility in any odd showers.

Temperature: **Valleys:** Plus 9 Celsius, rising to plus 22 Celsius.
At 600m: Plus 11 Celsius, rising to plus 17 Celsius.
Freezing level: Above the summits all day.
